Size and weight

- ✓ • nice and compact to carry!
- ✓ • since the camera is small and light, it's easy to carry around those heavy, bulky cameras either!
- ✗ • the camera feels flimsy, is plastic and very light in weight you have to be very delicate in the handling of this camera

Making progress on this problem...

- The task is difficult! What tools do we need?
 - Knowledge about language
 - Knowledge about the world
 - A way to combine knowledge sources
- How we generally do this:
 - probabilistic models built from language data
 - $P(\text{"L'avocat général"} \rightarrow \text{"the general avocado"})$ **low**
 - $P(\text{"L'avocat général"} \rightarrow \text{"the general advocate"})$ **high**
 - Luckily, rough text features can often do half the job.
