Parallel and Distributed Computing

Lecture 4B

Danyal Farhat

FAST School of Computing

NUCES Lahore

Research Methodology

Lecture's Agenda

- **Difference Between Conference and Journal Paper**
- **Paper Structure**
- **Peer Review: How It Works?**
 - Procedure of Paper Acceptance
- **An Overview on IEEE Xplore Digital Library**
- **Additional Sites**

Difference Between Conference and Journal Paper

Publish

IEEE journal or IEEE conference?

- A **journal article** is a fully developed presentation of your work and its final findings
 - Original research results presented
 - Clear conclusions are made and supported by the data
- A **conference article** can be written while research is ongoing
 - Can present preliminary results or highlight recent work
 - Gain informal feedback to use in your research
 - Typically shorter than journal articles, with less detail and fewer references

Difference Between Conference and Journal Paper

Publish

Finding the right IEEE publication or IEEE conference

IEEE has approx. **200 unique periodicals** covering a wide range of technical areas

- Review the journal listings
 - Who reads it
 - What they publish
 - What types of articles are they looking for?

IEEE publishes approx. **1,900 leading-edge conference proceedings** every year

- Review the conference calendar
 - Find a good match for your research subject matter
 - Ensure you are available to present

Paper Structure

Paper Structure

Technology Format (the typical IEEE format)

[illegible]

INDEX TERM 1 Enter key words or phrases in alphabetical order, separated by commas. Using the **IEEE** **Thesaurus** can help you find the best standardized keywords to fit your article. Visit the thesaurus online version here for free access to the **IEEE Thesaurus**: <http://therti.ieee.org/explains/whatsnew/thesaurus.html>

5. THE CONCLUDING SCENE

This document is a template for Microsoft Word versions 6.0 or later. If you are sending a paper as IEEE version of this document, please download the electronic file. Word template from the IEEE Author Center at <http://www.ieee.org/authcenter/word-ieee-template/word-ieee-template.html> or you can use it to prepare your manuscripts. If you would prefer to use LaTeX, download IEEE's LaTeX style and sample files from the same Web page. You can also explore using the Overleaf online at <http://www.overleaf.com/latex/75-how-to-use-overleaf> with an account. ieee-quick-guide@ieee.org

8. GUIDELINES FOR MANUSCRIPT PREPARATION

When you open a new document, either "Page Layout" or the "View" menu in the menu bar (View > Page Layout) (these instructions assume Windows 4.0). These versions may be different ways to access the same *font* functions, but it's the same. There, you enter numbers of *font* size, *font* faces or *font* and *font* style, another document and our *font* style. The *font* style *font* size *font* size is at the left of the *font* style. The *font* style is the top of your *font* window (for example, the *font* style at the point in the document is "font"). Highlight a section that you want to change with a certain style, and then select the appropriate *font* in the *font* style. The *font* style will adjust your *font* and *font* spacing. Do not change the *font* size or line spacing to appear more like a normal *font* style or page. Use the *font* style, the *font* style.

Advanced Word versions open an PDF version of a document. The Word Action Center is no longer active/compatible with it to prepare joint use LaTeX, download to form the paper. With the Word 2010 edition it is no longer available.

from the corners of the
Dutton (Brown-Epstein
School and Don Tolt)
on the inside.
of your paper. If you
in, please observe the

the fact that they are directly (not indirectly as H_2O , NH_3 , etc.) and do not assume that inorganic ^{14}C is 'lost' as ^{14}C . In the table below they are the units of the activity.

and, by phrase, examples appropriate." Armed with the publisher's "initial card" (13), Wilson set to work (17): "9:25," ran "23." One moment, an "80.1" was "inscribed" in "intended" ~~square~~ not square matrix, "a range of values, with each of a number in

• **Give students a page number to find:** In the same way that you use time, position, and "Page In the Window" notes in the window log (Wlog), the following instructions assume that each student receives ultimately says to another for some function of time. Then, type out sections of time, and make it a more extensive document and use multiple styles down style notes in at the top of the formatting for the top of style window (for example, the points in the document is "Time"). Highlight a vertical line to designate with a column style, and the appropriate name on the style menu. The style is your basic and line spacing. Do not change the line spacing to negative more than one (a limited page). Use bold for emphasis, not bold (a limited page).

the equation editor to create the equation. The "Equation" window shows the edit key as negative twelve is parentheses. To make your text compact, you may use the [math](#) function, or appropriate operators. The parentheses and/or subscripts. For example, the equation $x^2 + y^2 = z^2$ is a common one.

The note that the symbols in your equation defined before the equation appear in a following sentence (I might refer to the fact that T is the last value. Refer to "1)" and "equation (1)" instead of the beginning of "Equation (1) = ..."

[illegible]

The 10 amp line magnetic field strength is 100 Gauss. If you wish to use units of 1 volt magnetic flux density $\mathbf{B}$ in oersteds, the relationship is $\mathbf{B} = 10^4$ Gauss for the units and is constant.

Paper Structure - Title

Paper Structure Title

An effective title should...

- Be specific, concise, and descriptive
- Answer the reader's question: *Is this article relevant to me?*
- Think about what you would search for if you were looking for articles related to your research. Be sure to incorporate those keywords into your title.
- Grab the reader's attention
- Describe the content of a paper using the fewest possible words

Good
Title

VS.

Bad
Title

Paper Structure - Abstract

Paper Structure Abstract

- Concise summary of research conducted, results obtained, and conclusions reached
- A “stand-alone” condensed version of the article
- Typically, 250 words or less
- Uses keywords and index terms

The image shows a screenshot of a research paper's abstract page from IEEE. The paper title is "Hierarchical Control of Droop-Controlled AC and DC Microgrids—A General Approach Toward Standardization". The authors listed are Joaop M. Guerrero, Juan C. Vasquez, José Matas, Luis García de Vicuña, and Miguel Castilla. The abstract text describes a hierarchical control system for microgrids. Three callout boxes are overlaid on the left side of the abstract:

- What you did** (green box): Points to the "Abstract" section.
- Why you did it** (blue box): Points to the "Introduction" section.
- How the results were useful, important and move the field forward** (red box): Points to the "Results" section.

Additional information visible on the page includes:

- 2637 Page Citations
- 28160 Full Text Views
- Published in: IEEE Transactions on Industrial Electronics (Volume: 58, Issue: 1, Jan. 2011)
- Page(s): 158 - 172
- INSPEC Accession Number: 11692753
- Date of Publication: 12 August 2010
- DOI: 10.1109/TIE.2010.2066334

Activate Windows

Paper Structure - Keywords

Paper Structure Keywords

- Be sure to use keywords in the Title and Abstract to maximize discoverability.
- Articles are often assigned EICs based in part on keywords, so make sure your choices are relevant and specific.
- Think about what you would search for if you were looking for articles related to your research. Be sure to incorporate those keywords.

Paper Structure – Literature Review

- Literature review can be a separate heading or included in the introduction

Paper Structure

Introduction

- A description of the problem you researched
- It should move step by step through the following:

Paper Structure - Introduction

Paper Structure

Introduction

- A description of the problem you researched
- It should move step by step through the following:

Paper Structure – Methods OR Research Methodology

Paper Structure Methods

- Problem formulation and the processes used to solve the problem, prove or disprove the hypothesis
- Use illustrations to clarify ideas and support conclusions

Paper Structure – Experiment

- Experiment can be a separate heading or included in the research methodology

Paper Structure Methods

- Problem formulation and the processes used to solve the problem, prove or disprove the hypothesis
- Use illustrations to clarify ideas and support conclusions

Paper Structure – Results

Paper Structure

Results

Demonstrate that you solved the problem or made significant advances

Summarize the Data

- Should be clear and concise
- Use figures or tables with narrative to illustrate your findings

Tables

Present representative data or used when exact values are important to show

Figures

Quickly show ideas/conclusions that would require detailed explanations

Activat

1998
1999
2000

Paper Structure – Conclusion

Paper Structure

Conclusion

- Explain what the research has achieved
 - As it relates to the problem stated in the Introduction
 - Revisit the key points in each section
 - Include a summary of the main findings and implications for the field
- Provide benefits and shortcomings of:
 - The solution presented
 - Your research and methodology
- Suggest future areas for research

Paper Structure – References

Paper Structure

References

- Support and validate the hypothesis your research proves, disproves, or resolves
- There is no limit to the number of references
 - But use only those that directly support your work (about 30)
- Ensure proper author attribution
 - Author name, article title, publication name, publisher, year published, volume, page number, and Digital Object Identifier (DOI)

**Properly
cited
material**

Peer Review: How It Works?

Peer Review: How It Works?

Why IEEE editors and reviewers reject papers

- The content is not a good fit for the publication
- There are serious scientific flaws:
 - Inconclusive results or incorrect interpretation
 - Fraudulent research
- It is poorly written
- The work was previously published
- It does not address a big enough problem or advance the scientific field
- The quality is not good enough for the journal
- The paper does not make a strong enough case to convince reviewers
- Poor structure and presentation

Peer Review: How It Works?

Ethical publishing – Plagiarism

Avoid plagiarism

- Cite and separate any verbatim copied material – **but how much?**
- Paraphrase other's text properly, and be sure to include citations
- Credit any ideas from other sources
- Familiarize yourself with IEEE Policies

Peer Review: How It Works?

Ethical publishing – Duplication, Redundancies and Multiple Submissions

- **Author must submit original work that:**
 - Has not appeared elsewhere for publication
 - Is not under review for another refereed publication
 - Cites previous work
 - Indicates how it differs from the previously published work
 - Authors **MUST inform the editor** when submitting any previously published work

An Overview on IEEE Xplore Digital Library

About the IEEE

- World's largest technical professional organization with over 400,000 members globally
- Not for profit organization "Advancing Technology For Humanity"
- Core areas of activity:
 - Membership organization
 - Conferences organizer
 - Standards developer
 - Publisher of journals, conferences, standards, eBooks, and eLearning
- IEEE Xplore® Digital Library by the numbers:
 - More than 5.5 million total documents
 - More than 15 million downloads per month
 - Over 5 million unique users each month

IEEE Smart Village Activities

A volunteer network empowering off-grid communities through education and the creation of sustainable, affordable, locally owned entrepreneurial energy businesses serving 70,000 people in 280 villages in Cameroon, Haiti, Nigeria, Kenya, South Sudan, Himalayas, India and more. smartvillage.ieee.org

IEEE Action on Climate Change

IEEE is committed to helping combat the effects of climate change through pragmatic and accessible technical solutions and providing engineers and technologists with a space for discussion and action. IEEE has also developed a climate change collection of articles on IEEE Xplore. climate-change.ieee.org

Abstract— one of the features of intelligent learning environments is the presence of a personalized mechanism to assist the effective learning for each learner. Exploiting personalized tutoring models, learners can experience successful and satisfying learning outcomes due to their learning objectives. In this way, the learner (student) feels that there is always an aware and insightful tutor (teacher) alongside, providing private guidance on the learning path. While personalizing the learning environment is highly desirable, the continuous monitoring of the virtual teacher may lead to fatigue (and even disillusionment) for the learner, potentially reducing the efficiency of the e-learning environment. Considering the above points, in this article an intelligent system has been designed to identify fatigue in learners by examining changes in their facial expressions. To achieve this, a combination of eye and mouth features of the learner is utilized, and with the help of a deep neural network, the level of learner fatigue is detected. The proposed system employs the MediaPipe algorithm for face and eye-mouth feature identification, and for training the neural network model, the EfficientNet neural network has been utilized. In this system, databases NITMED and DrowsinessDetection have been utilized for training the network. Additionally, 80% of dataset has been used for training and the remaining 20% for testing. It is worth mentioning that given the balanced distribution of samples for each class, accuracy is employed as the evaluation metric, considering the objective of minimizing false positives. The experimental results show the accuracy and precision of 99.73% and 99.77% for the eye model, respectively, and the same

I. INTRODUCTION

E-learning is an approach to learning that leads to the creation of an open, flexible, and distributed environment. By "open" we mean an environment where learning can take place independently of the learner's location, time, and learning pace. "Flexibility" implies that the learner can choose the form and process of his/her education. Additionally, "distributed" means that the learner, the instructor, and the educational content can be decentralized and located in various places [1]. One of the prominent features of this educational method is its ability to be present anywhere, anytime, and at any pace. Therefore, it can be considered as an opportunity to overcome the challenges of traditional education systems, such as the distance between the tutor and the learner, time, cost, and the physical well-being of the learner [2].

From another point of view in a face-to-face education system, due to direct interaction between teacher and student, tutors can engage with learners based on their facial expressions. However, this is not the case in online environments; hence, this issue has become one of the main disadvantages of e-learning systems [3].

Sometimes, learners (students) in the classroom may experience fatigue, significantly reducing the quality of education. In such situations, tutors (teachers) typically

18 Pages Journal Paper

The screenshot shows a web browser with multiple tabs. The active tab is titled 'IEEE Xplore Full-Text PDF: Informing Machine Perception'. The address bar shows the URL 'ieeexplore.ieee.org/stamp/stamp.jsp?tp=&arnumber=10496903'. The page header displays the title 'The Social Implications of XR: Promises, Perils, and Potential' and indicates the current page is '1 / 18' with a zoom level of '113%'. The main content area features the title 'The Social Implications of XR: Promises, Perils, and Potential' in a large font. Below the title, the authors are listed: Katina Michael (Arizona State University, Tempe, AZ 85287 USA), Savvas Papagiannidis (Newcastle University, NE1 7RU Newcastle upon Tyne, U.K.), and Roba Abbas (University of Wollongong, Wollongong, NSW 2522, Australia). The text begins with a paragraph starting 'In 1992, STEPHENSON [1] described a type of metaverse in his science fiction novel *Snow Crash*. Through his imagination, Stephenson is said to have directly influenced the makers of Google Earth, and, more recently, Silicon Valley's "Metaverse" [2]. In addition, there was a spate of literature published 15–20 years ago, related to metaverse concepts with to offer unique virtual–physical–social applications for organizations and other members of society. According to IxDF, the term XR "does not refer to any specific technology; it includes any existing or new technologies that may be created in the future that alter reality, either by blending the digital and the physical world or by creating an entirely virtual

IEEE ORCID ID

Additional Notes ORCID ID

- Persistent unique 16-digit identifier, commonly used for authors.
- IEEE (and many other publishers) require an ORCID ID to help tie an author to his or her publication record.
- Distinguishes you from every other researchers (esp. with the same name)
- Without ORCID, it's hard to distinguish between multiple authors with the same name, or get a complete publication history when authors change their names.
- Collects all your professional activities in one place
 - Publications
 - Funding
- Employment, education, and publication record can all be linked to ORCID.
- For more information about ORCID, visit <https://www.orcid.org>

The website header includes the WikiCFP logo, a search bar for computer science papers, and a note that it is powered by Semantic Scholar. The main content area is divided into several sections: a 'Welcome!' message with social media links, a 'Popular Categories' table, a 'Popular CFPs' table, and a 'Popular Lists' table. Below these are sections for 'Authors' and 'Organizers' with their respective benefits. At the bottom, there is a 'Most Recent Calls For Papers' table listing upcoming events like CASCON 2024 and 6G AI-NET 2024. A sidebar on the left contains navigation links for Home, Categories, CFPs, Conf Series, My List, and On iPhone/Android. A search bar in the sidebar allows users to search for CFPs by year (currently set to 2024).

WikiCFP
A Wiki for Calls For Papers

Search computer science papers

Powered by Semantic Scholar

Welcome!

WikiCFP is a [semantic wiki](#) for Calls For Papers in science and technology fields. There are more than [100,000 CFPs](#) on WikiCFP. Over [100,000](#) researchers use WikiCFP each month.

Popular Categories

Category	CFPs
computer science	8151
artificial intelligence	8191
NLP	2099
machine learning	5227
computer vision	1630

Popular CFPs

Event	Users
GreeNet Sym...	49
IEEE-Ei/Scop...	43
CCVPR 2024	57
ICMLA 2024	45
IEEE-Ei/Scop...	57

Authors

- + Build my CFP list in minutes.
- + Search and sort by title, category, location and year.
- + Browse with graphical timeline.
- + Subscribe to RSS of lists and various [categories](#).
- + Get [email](#) and iCal reminders.

Organizers

- + Present CFPs to thousands of researchers.
- + Broadcast CFPs to [Twitter](#) and [Facebook](#).
- + Push CFPs to targeted RSS subscribers.
- + Check numbers of views and users following my CFPs.
- + Update CFP information timely.

Most Recent Calls For Papers

Event	When	Where	Deadline	
CASCON 2024	34th International Conference on Collaborative Advances in Software and Computing Nov 11, 2024 - Nov 15, 2024	Toronto, ON, Canada	Jun 21, 2024 (Jun 10, 2024)	☐
6G AI-NET 2024	1st International Workshop on AI-Native Sustainable & Resilient 6G Networks Oct 21, 2024 - Oct 21, 2024	Paris, France	Aug 13, 2024	☐
